New Mexico Quick Start Guide – Comagine Health Provider Portal

Submitting Traditional Medically Fragile Budget Requests

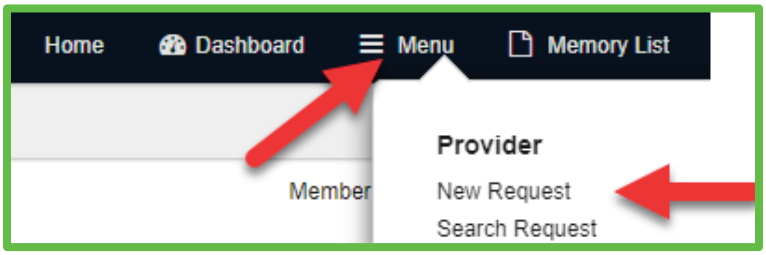

OVERVIEW

The Jiva system has been updated to the 6.3 version. In this version, users can access the home page, dashboard, and menu options. The Home button will take users to the home page from anywhere in the Jiva system. The Dashboard will provide an overview of submitted requests, pending requests and decisioned requests. The Menu button provides options to submit a new request, search for a member and manage the administrative functionalities. The Memory List will provide a list of episodes that have been viewed or recently created. It is important to close out each episode from the memory list to ensure that Comagine Health staff are able to work the episode.
