Comagine Health

How to Register with One Health Port to Access the Comagine Health Provider Portal

What is One Health Port?
One Health Port is a secure portal that opens the door to valuable business and clinical solutions with a single way to sign on to local healthcare sites and online services for healthcare professionals. Single Sign-On users can access information from all participating organizations by signing in once with a Subscriber ID. This process simplifies access to provider portals. It is free to providers.

Comagine Health participates in the single sign-on program with One Health port. To access the Comagine Health Provider Portal (CHPP), your organization should be registered with One Health Port *before* you submit a request to have access to the CHPP.

Please go to http://www.onehealthport.com/single-sign/register-your-organization for information on how to register your organization with One Health Port.

After you register with One Health Port
Once your organization is registered with One Health Port, email Comagine Health to request a Provider Portal Registration Packet: WaGovtProviders@comagine.org

Comagine Health will set up the account for the System Administrator(s) only. Each organization will choose a system administrator(s) who will be responsible for granting access for their employees. Only the primary system administrator needs to contact Comagine Health for access. Comagine Health will set up the account for your organization and create an affiliation between your System Administrator's One Health Port Subscriber ID and your One Health Port Organizational ID within the Comagine Health system.

Comagine Health will notify the System Administrator when the account is set up, generally within 1-2 business days of verification of the One Health Port account information. The notification email will include instructions for accessing the CHPP via One Health Port as well as instructions for adding users for the facility.

Questions?
If your organization is unable to register with One Health Port, or if you have any other questions, please contact Comagine Health and a member of the leadership team will be able to assist you.
